

## JOB OPPORTUNITY

**Job Title:** Web and Applications Developer.  
**Organisation:** Watoto Church Ministries.  
**Duty Station:** Watoto Church, downtown.

**Watoto Church Ministries has experienced exponential growth in the past couple of years, composed of multiple Celebration Centres (Campuses) and diverse Community care initiatives that include Child Care, Neighbourhood, Education, and FM Radio, amongst others.**

**Watoto Child Care Ministries exists to empower vulnerable women and children through Christ-centred, holistic care for community transformation. At its core, Watoto Church Ministries remains a local church, committed to Celebrating Christ and Caring for Community.**

### Job Purpose:

We are seeking a dedicated and dynamic Web and Applications Developer to design, develop, and maintain web and mobile applications, ensure high availability, security, and scalability for Watoto Ministries.

### Key Duties and Responsibilities.

- Design, develop, test, and deploy web and mobile applications.
- Ensure applications are secure, scalable, and user-friendly.
- Maintain and update applications, ensure compatibility with current technologies.
- Support web infrastructure, databases and host environments.
- Monitor system performance and troubleshoot issues to ensure maximise uptime.
- Ensure regular backups, system upgrades, and documentation.
- Manage relationships with service providers, ensure service quality and value for money.
- Develop and deliver training programs for staff on web and enterprise applications.
- Provide technical support and resolve application-related issues in a timely manner.
- Stay updated with emerging technologies in web development and cloud computing
- Recommend and implement improvements to optimize ICT services and applications
- Participate in recognised developer communities or professional bodies, both locally and internationally, to foster knowledge-sharing and innovation.

### Qualifications, Skills, and Experience.

- The applicant for the role should hold at least a minimum of a bachelor's degree in computer science, ICT, or a related field
- At least a minimum 2 years' experience in web and mobile application development
- Strong knowledge of PHP, C#, JavaScript frameworks (e.g., React, Angular, Node.js)
- Experience with version control (Git), databases (MySQL, SQL Server), and cloud platforms
- Previous experience in development using PHP Frameworks is an added advantage
- Knowledge of project management methodologies and technical documentation
- Application development lifecycle expertise (design, coding, testing, deployment).
- Strong problem-solving and debugging skills.
- Excellent communication and customer service orientation.
- Ability to work collaboratively in a team and manage multiple priorities.
- Strategic thinking and adaptability to emerging technologies.
